

MIDDLEWEIGHT KNOCKOUT.

The McNeilus Contender front loader hits the sweet spot – delivering optimal weight to payload capacity – and meets the needs of a broad range of commercial and residential haulers. The new Contender: middleweight knockout.

New hydraulic canopy offers excellent coverage on all chassis cabs.

Heavy Duty 8pt locking tailgate

One piece 3/16" AR400 Hopper Walls

REPORTING FOR HEAVY DUTY

The Contender front loader is constructed from the same heavy-duty AR400 and AR450 steels that have earned a reputation for toughness across the country. Its high strength rounded body floor, and X-Wear chromium carbide shoes ensure that critical areas are built to last. And the Proven Excalibre™ hydraulic cylinders offer superior packing performance. The Contender front loader is available in a 13 cubic yard hopper size and a body capacity range from 32 to 43 cubic yards.

SMART CONTAMINATION CONTROL

The Excalibre cylinders feature a hardened tool steel scraper that removes cylinder rod dings and nicks before they can reach the seals, prolonging cylinder life and maintaining hydraulic system integrity.

By addressing the primary cause of hydraulic contamination through the design of the tool steel scraper, the cylinders are the first line of defense against hydraulic compromise. Advanced filtration, tank design, and the Street Smart Parts™ line of support tools and preventative schedules will keep your truck on the road.

Excalibre™ Packing cylinders

DESIGNED FOR OPERATORS

The ergonomic Command Zone® cab controls and multiplexed system are integrated into the dash. And the need to stuff relays, large bundles of wiring harnesses, and switches under the dash is eliminated. Control surfaces are backlit, laser etched, and operator friendly. The Command Zone controls also enable great sightlines, and feature easy to understand symbols and feedback lights to indicate functions. The proven components are designed for the harsh realities of the refuse business.

Command Zone controls improve operator ergonomics and productivity

Command Zone Multiplex controls, integrated into the chassis cab

NGEN

McNeilus offers a wide range of chassis choices and engine options – including our Next Generation (NGEN) Compressed Natural Gas (CNG) system. McNeilus is an industry leader in CNG-powered garbage trucks. They run quieter, offer enhanced fuel economy, help the environment, and reduce our dependence on foreign oil. With CNG installed right at the factory, you can take advantage of the green initiative with no impact to your body lead time. With multiple configurations available – and innovate features like our defueling module – McNeilus can help you navigate this new technology.
